

EVERYTHING FOR WINDOWS

EVERYTHING FOR PROFESSIONAL SURFACE REPAIR
FOR WINDOWS AND FRONT DOORS

Welcome to König North America LLC— Your expert in premium repair products!

König North America LLC has its roots back to 1996 as the exclusive importer and distributor of Heinrich König GmbH & Co. KG in North America to meet the growing demand for high quality and innovative repair systems. Since 1892, Heinrich König has stood for quality and innovation in the repair industry. With a proud tradition and a clear vision for the future, we are pleased to present our high-quality products for the window industry.

Our extensive product range has been specially developed to meet the demanding requirements of the window industry and window craftsmen. In industrial production, our products help increase manufacturing efficiency by eliminating defects early on, thereby reducing scrap and replacement costs. But we also know that windows are more than just functional—they are an aesthetic and functional element that shapes the character of buildings. That's why we offer products that not only repair effectively but also preserve the beauty and durability of your windows, ensuring long-term customer satisfaction.

Discover our PREMIUM Window Pen, a pen system specifically developed for use in miter grooves and recommended by leading manufacturers. With its plasticizer-resistant coating system—which is also available as a spray paint—painting and touch-up work can be performed easily, even on window seals. The paint is also more UV-resistant than conventional acrylic paint. For the demanding requirements of outdoor use, we offer our Hard Wax PLUS Filler, which retains its shape even at extreme temperatures ranging from -20°C/-4°F to +110°C/+230°F degrees and is therefore also suitable for surfaces exposed to direct sunlight. In addition, we present our Aqua Soft-Cleaner, a cleaner specifically developed for use on matt-foiled plastic surfaces. It effectively cleans the film without altering its matt finish.

Our product line is designed for industrial system providers, window manufacturers, and installers who value quality and reliability. You can count on the many years of experience and expertise of König North America LLC—your trusted partner for premium restoration products.

Explore our product range and get in touch with our experienced sales team—we look forward to assisting you with your specific needs.

Welcome to König North America LLC—where quality is a tradition and innovation shapes the future!

TOUCH-UP

Example: Coloring a Miter Grooves with PREMIUM Window Pen

*All Colors and Technical Data Sheets and more are in our Webshop - scan QR-Code)

From completely covering window grooves during manufacturing to touching up damaged areas in existing windows: We have the right pen system for every application. Recommended by RENOLIT and other leading manufacturers, the PREMIUM Window Pen has been a best-seller in the window industry for years. With its unique valve technology, high-quality paint, and optimized tip, the PREMIUM Window Pen is perfect for filling various miter grooves and for precise touch-ups, even in hard-to-reach areas. For glazing touch-ups and imitating the finest wood grains (e.g., on wooden windows), the Graining Pen is the perfect choice, while Color Touch-up in a brush bottle and PREMIUM Edge Pen were specifically developed for opaque touch-ups in numerous wood and RAL colors.

PREMIUM Window Pen

Characteristics:

- Optimized tip and lacquer quality ensure a continuous lacquer flow.
- Dries quickly, scratch-proof and overcoatable
- Plasticizer-resistant Acrylic-lacquer
- Wipe-resistant
- Spare Tips (see page ...)

Order Code

243546-164
243596-164

Product Description:

Single Pen, window colors at choice*
Single Pen, metallic colors at choice*

*Add the desired color number to the order code.

Uses:

A covering lacquer pen specifically designed for coloring miter grooves in window construction (see photo gallery). The pen is also ideal for touch-ups on decorative finishes. Recommended for both indoor and outdoor use.

Always strikes the right color: The PREMIUM Window Pen when used on various miter grooves - available in a wide range of foil colors.

PREMIUM Edge Pen

Characteristics:

- Optimized tip and lacquer quality ensure a continuous lacquer flow.
- Dries quickly, scratch-proof and overcoatable
- Acrylic based
- Available in many RAL-Colors and wood tones
- Spare Tips (see page ...)

Order Code

FILLERS

Example: Repair of a wooden window frame with Hard Wax PLUS

Scratches, edge damage, dents, drill holes, and other deep damage can be filled in no time at all with our fillers, which have been specifically developed to meet the requirements of the window industry - whether the profiles are made of wood, white PVC, or foil-laminated materials. When used in combination with König touch-up materials and spray lacquers, damaged areas can be repaired to an almost invisible finish. This often eliminates the need to replace entire windows, saves costs, and increases your customers' satisfaction.

*All Colors, Technical Data Sheets and much more in our Webshop - scan QR-Code

Hard Wax PLUS

Characteristics:

- Very hard, melts at 115°C/239°F
- Good elasticity, dimensionally stable from -20°C/-4°F to +110°C/230°F
- Available in 8cm and 4cm sticks
- All colors can be intermixed
- Available in many RAL-colors and wood tones as well as many RENOLIT/COVA/HORNSCHUCH-colors

Uses:

Especially for scratches, holes and edge damage to real wood, artificial and laminate surfaces in the kitchen, window and flooring sector. Suitable for indoor and outdoor use. Melt, apply and level with the combination Planer or Special Fillers applicator.

With the colored lacquers from our Sprüh König® brand, partial surfaces and individual window components can be refinished quickly and efficiently. Our specially formulated lacquer is also suitable for application on window seals, as it is resistant to the plasticizers contained in the sealing materials. Combined with our color lacquers, our clear and effect lacquers enable the precise restoration of the original gloss level, surface texture and metallic shimmer of the window profile. All Sprüh König® products are perfectly matched to work together, offering excellent adhesion, fast drying times and consistently high-quality repair results.

LP Shade Equalizer

Characteristics:

- Colored, highly translucent NC-lacquer
- Sheen level: silk matt

Uses:

For an intensive coloring/re-coloring of small parts of wood and laminate surfaces in interior areas. To level off minor lacquer damage and to adjust slight color deviations.

Order Code

328000-240

Product Description:

LP Shade Equalizer, 400ml
colors at choice*

* Add the desired color number to the order code

PF Covering Lacquer

Characteristics:

- Full-covering acrylic lacquer
- Sheen level: silk matt

Uses:

For a fully opaque color adjustment and for the varnishing of repairs in the solid color sector. To varnish partial areas. For interior and exterior use on solid wood, laminate, metal and many plastic surfaces.

Order Code

372000-240

Product Description:

PF Acrylic Covering Lacquer, 400ml
colors at choice*

* Add the desired color number to the order code

LP Shade Equalizer and PF Acrylic Covering Lacquer can always be applied in the correct shade: Color matching for window profiles and solid color surfaces.

Special Repair Lacquer PLUS

Uses: To seal repairs without showing overspray and to adjust the sheen of the surface. For indoor use on wood, laminate and metal surfaces. Soft spray technology: considerably less spray mist, a smoother and pressure-reduced spraying and an even finer spray mist. **Characteristics:** Transparent nitrocellulose combination lacquer, available from deep matt to gloss.

Order Code

3**300-215

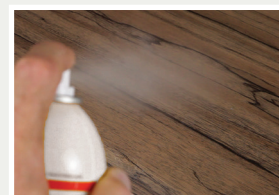

Product Description:

Special Repair Lacquer PLUS, 150ml*

3**300-240

Special Repair Lacquer PLUS, 400ml*

* Add the desired gloss number to the order code

Ideal for adjusting gloss levels or applying sealants. The fine mist produced by the soft-spray technology ensures the best results.

AQUA Clear Lacquer

Uses: A high build lacquer to seal repairs and to re-lacquer small parts. For interior use on wood, laminate and metal surfaces. Ideal for oiled and waxed surfaces. **Characteristics:** Water-based transparent acrylic lacquer. The environment-friendly alternative to the Furniture Lacquer PLUS. Odorless. Very little color-intensifying effect.

Order Code

Effect Lacquer, Fine Pearl Texture

Uses: For use on décor pearl texture surfaces (solid colors), e.g. on window profiles. Must afterwards be painted over with the appropriate covering lacquer. Can be used on surfaces in the interior and exterior. **Characteristics:** Acrylic-based clear lacquer with fine pearl texture effect. Dries rapidly. Good adhesion to many lacquer and plastic surfaces (not to Soft-uPVC). Sheen level: matt.

Order Code

348000810916-240

Product Description:

Effect Lacquer, fine pearl texture, 400ml

Anti Stick Agent

Uses: To prevent sticking grooves between sealing tape and the not yet cured thick layer glaze on windows and doors (ensures resistance to caking). For indoor use. **Characteristics:** A colorless, wax-based product free from silicone.

Order Code
322000-245

Product Description:
Anti Stick Agent, 400ml

Universal Basecoat

Uses: For an embedding priming, e.g. as sealing primer for a new structure, as blocking primer for a repair, as smoothing primer for closed-porous surfaces. To be used on both light and dark woods. Recommended for indoor use. **Characteristics:** A transparent lacquer based on nitrocellulose. Can be sanded after approx. 20 minutes. Little firing effect. Overcoatable with all König touch-up and aerosol lacquers. Sheen level: matt.

Order Code
312000-240

Product Description:
Universal Basecoat, 400ml

Spray Caps & Spray Can Handle

Spray Can Handle: The Spray can Handle as an attachment to aerosol cans, allowing convenient permanent spraying.

Spray Caps: To ensure optimal application of the various spray paints, you'll find the appropriate spray nozzles in our online store—from wet painting to the finest misting.

Moisture & Bloom Remover PLUS

Uses: To remove grey bloom, water and alcohol stains on NC lacquered surfaces. For indoor use. **Characteristics:** A fast reacting lacquer dissolvent, providing a complete new formation of the upper lacquer coat.

Order Code
319000-245

Product Description:
Moisture & Bloom Remover Plus, 400 ml

Prime Lacquer White

Uses: A high build and completely opaque primer, when body, interior parts, MDF-boards and chip-boards are to be re-coated with a covering lacquer. A mobile spray system for priming. For indoor and outdoor use. **Characteristics:** A white-tinted nitrocellulose-based primer. Physically drying system. Good crosslinking and flow properties with excellent hardness and resistance. Very good for sanding.

Order Code
359000-240

Product Description:
Prime Lacquer Plus, 400ml

Adhesion Primer

Uses: Adhesion Primer to improve lacquer adhesion to diverse plastic materials and metals in combination with König clear and color lacquer systems. To increase lacquer adhesion to König fillers under mechanical stress. Suitable for indoor and outdoor use. **Characteristics:** A physically drying system. A single application is sufficient. Matt film formation. Dries rapidly.

Order Code
313700-240

Adhesion Primer, 400ml

KING AIRBRUSH

KING in action: Precise spraying of window components

With the innovative, compressed-air-powered KING Airbrush System, we enable you to perform professional repairs even under challenging conditions. Combined with our plasticizer-resistant lacquers, this innovative cartridge system allows you to carry out your painting work efficiently and precisely, even on windows: spraying even the smallest areas with pinpoint accuracy becomes a breeze, and even overhead painting is easily achievable thanks to the easily controllable airflow. We also offer empty cartridges for filling with your own lacquers, so that other paint systems can be used with the KING Airbrush System.

KING Spray Device

Order Code
409030
409050

Product Description:
KING Complete Set: with nozzle Ø 0,3mm
KING Complete Set: with nozzle Ø 0,5mm

Uses:

- Possible to work overhead
- Possible to process small quantities
- No risk of splashing or leaking
- Very short drying times
- Easy change of cartridges
- Resealable cartridges

Characteristics: The KING Spray Device including hose with standard quick-release coupling for compressor (11mm), special grease, instructions for use - with nozzle cartridge in either Ø 0.3 mm or Ø 0.5 mm.

KING Cartridges

*All Colors, Technical Data Sheets and much more in our Webshop - scan QR-Code

Clean working: Thanks to the cartridge system, there is no longer a risk of splashing or leaking of the color, making it possible to work cleanly even on difficult to reach areas and overhead. **Flexible color play:** The color cartridges can be exchanged during one working cycle as often as desired. Thus, there are no limits of color variation for the user. The cartridges are available in many colors. **Efficient and economical:** Being resealable, the cartridges make it possible to process small quantities. And the selective application and fine layers of paint result in very short drying times. **Easy to clean:** A cleaning cartridge ensures cleaning in seconds.

CLEANING

Designed specifically for matt and super-matt window foils: The new AQUA Soft-Cleaner

For the cleaning and care of window profiles, we offer a range of high-performance products designed to meet the specific needs of different surfaces. Led by our latest cleaner, the Aqua Soft-Cleaner—which truly shines on matt and super-matt surfaces. In addition, our silicone-free, wax-based lubricant ensures easy maintenance of moving parts, keeping them running smoothly.

AQUA Soft-Cleaner

Uses: For the professional cleaning of matt and super-matt foil-coated surfaces and plastic window profiles. Extremely thorough, extremely gentle and recommended by leading foil manufacturers: For cleaning foil-coated surfaces, it shows its full capabilities especially on matt and super-matt foils (such as Skai[®] mattex or RENOLIT PX Matt) without changing the gloss level of the surface. The AQUA Soft-Cleaner also reliably cleans plastic window profiles (PVC white and colored) and painted, non-absorbent surfaces. In addition to marking lines, labels, adhesive residue and residues from protective films, the cleaner also effortlessly removes bitumen and butyl, foreign body abrasion (e.g. rubber) as well as emission deposits and construction dirt. And that, of course, both indoors and outdoors. **Characteristics:** Water-based emulsion with intensive cleaning action. Antistatic effect.

SANDING AND POLISHING

Sandpaper in action: Finishing a repaired area

Optimal preparation leads to the best possible final result. With the sanding and polishing kit, fine scratches and sanding marks can be removed directly, or more extensive damage can be optimally prepared for further restoration.

Sanding and Polishing Set UPVC Windows/Doors

Uses: For removing scratches and slight abrasion from solid-colored white UPVC profiles. Also suitable for rounded, thermoset edges on kitchen countertops.

Product Description: Marking Pen, Special Scraper, small, Micro Sanding Paper, 5x Wet Sandpaper, Cork Sanding Block with Felt Pad, Cotton Cloth (DIN A5) - 5 pcs., 5x Special Cloth, Sanding Liquid, 250 ml, Polishing Paste, fine, 150 ml

Order Code: 657700

REPAIRLUX® Polishing Paste

Uses: REPAIRLUX® polishing paste for natural and artificial stone for fine polishing of the surface and flat grinding after repair work.

Order Code

403039-605

Product Description

Repairlux® Polishing Paste, 150ml

Polishing Paste, fine

Uses: To polish out fine sanding streaks and abrasion on high gloss surfaces. Waterbased product - does not leave any residue.

Order Code

655600-605

Product Description

Polishing Paste, fine 150ml

Sanding and Polishing Cloth

Uses: White side to dull shiny patches on the surface, to clean plastic and varnished wood surfaces and to remove spray mist. green side for polishing and to produce a gloss finish on matt surfaces.

Premium Wire Wool

Uses: For finest lacquer sanding, to tone down a heavy application of touch-up products and for the gentle cleaning of the melter tips (Gas Heating Iron, Battery Melter and Electric Heater).

Cotton Cloth

Uses: Used together with Felt Pad and Liquid Sandpaper to remove filler residue. For cleaning and maintenance work. Cotton texture, washed.

Special Cloth, 30 pieces

Uses: A highly absorbent, lint free and tear-proof textile cloth. Indispensable for all cleaning, sanding and polishing work. Very gentle to high-gloss surfaces.

Sanding Pad Coarse

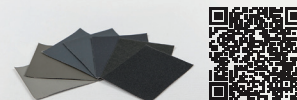

Uses: For removing filler residue with a light sanding effect and for dulling shiny spots. Grit: 1500

Feld Pad with abrasive

Uses: The Felt Pad is used with a cloth to remove filler residue and to process polishing paste. The version with abrasive lining is used to remove filler residue without a cloth.

Micro-Sanding Paper

Uses: For sanding fine scratches. Suitable for all kinds of lacquer surfaces. Can be used on acrylic/perspex, polyester, hard-PVC, brass and aluminum. Excellent results on high gloss surfaces. Washable.. Available in a set with seven grits (1800 is 12000).

Cork Sanding Block

Uses: The Cork Sanding Block is used with sandpaper to maintain a flat sanding surface. Simply wrap the sandpaper around the cork Sanding Block and begin sanding.

Feld Pad

Uses: The Felt Pad should be used with the Cotton Cloth and Liquid Sandpaper to evenly remove the excess filler after the repair is completed.

Simply use the QR-Code for each product: Here you will find more information, individual item numbers and much more.

EVERYTHING IN ONE PLACE!

Kits and Assortments for the window industry

See for yourself what our product lines have to offer—whether for the workshop, production, or on-site use at the customer's location: The systems are perfectly tailored to the needs and applications of the window industry and are organized in a highly practical and clear manner in wooden or plastic cases.

Universal-Kit Windows/Front Doors

Uses: The comprehensive kit for the repair of windows, doors and green house: the Universal Kit. Equipped with Hard Wax PLUS and PREMIUM Window Pen in popular Renolit window colors. Clear lacquers for sealing are also included, as are all the necessary processing aids. Everything in this kit is organized with a maximum degree of functionality and convenience. Pull-out compartments and pen holders allow for the kit's setup to be easily adjusted. Like a shelving system, the various compartments can be arranged according to your individual needs

Product Description: Hard Wax PLUS in white-, transparent- and colored shades as well as the series 670 (Window colors Uni-Dekor) und 671 (Window colors Wood-Dekor), Rex-Lith DUO - incl. hardener, 10x PREMIUM Window Pen from most popular window color shades, Touch-Up Paint Box - incl. auxiliaries, 1x each Furniture Lacquer PLUS 400ml in matt und silk gloss, Plastic Cleaner PLUS, Universal Maintenance Lacquer, Eco-Cleaner, Polishing Paste - fine, Cellulose Thinner and Sanding Paper, all auxiliaries and tools for processing.

Service-Kit Windows/Front Doors

Uses:

This kit is the „little brother“ of our Universal Kit. It features Hard Wax PLUS and PREMIUM Window Pens in the most popular Renolit colors as well as the most important accessories and clear lacquers for sealing.

Product Description:

Hard Wax PLUS in the Series 670 (Window color Uni-Dekor) and 671 (Window colors Wood-Dekor), 10x PREMIUM Window Pen in most popular window color shades, Touch-Up Paint Box - incl. auxiliaries, 1x each Furniture Lacquer PLUS 150ml in matt and silk gloss, Plastic Cleaner, Universal Maintenance Lacquer, Eco Cleaner, Polishing Paste - fine, Cellulose Thinner and many Sanding Paper, Sanding Liquid as well as all tools and auxiliaries for processing.

Repair Set Windows/Front Doors

Uses:

Tailored to the requirements of repairs in the UPVC window sector, we have clearly arranged our Hard Wax PLUS filler in a handy kit. The compact set is ideal for on-site use - whether during delivery and fitting or for customer services.

Product Description:

Hard Wax PLUS in the series 670 (Window colors Uni-Dekor), Hard Wax PLUS in the series 671 (Window colors Wood-Dekor), 1x Brush Pen Clear Lacquer silk gloss and silk matt for gloss adjustment and sealing a repaired surface as well as auxiliaries and tools for processing.

Reorder / Individual Items

Have you already run out of fillers, touch-up materials, or paints in your inventory, or would you like to add more colors? Or do you need to reorder a tool or accessory? No problem: Browse the various product categories in our complete catalog—you'll find everything you need there. And of course, the fastest way is online: Just visit our web store. There, you can conveniently order individual items—including all fillers and pens—with no minimum order amount.

Tools and Auxiliaries

Along with our repair products, we offer a wide range of compatible accessories that allow you to apply the products effectively and achieve the best results. All accessories are designed to work with our products and have proven themselves in use over the years. Our accessories support the full range of repair tasks.

Gas Heating Iron

Product Description: A mobile, gas-operated melting tool for the processing of meltable fillers: for melting, molding and color mixing. The temperature is infinitely adjustable. Because of legal regulations, the Gas Heating Iron is supplied in unfilled condition. We recommend to use high-quality pure butane lighter gas from renowned manufacturers.

Electric Heating Iron

Product Description: A stationary electrical melting device for continuous operation, serving the same range of use as the Gas Heating Iron. Easy to use due to temperature setting adapted to the different kinds of fillers.

Battery Melter (Blue)

Product Description: The Battery Melter is designed for melting fillers such as Hard Wax and Hard Wax PLUS. The melter has a curved tip for mixing and optimal application of the fillers—even in corners and along edges. In addition, excess wax can be easily scraped off using the melter's scraping grooves. When equipped with batteries, the Battery Melter is ready for mobile use. With the multi-adapter, it can be powered by the electrical outlet.

Spare Tips

Metal Planer, Special Fillers Applicator, Combination Planer and Special Scraper

Metal Planer: A precision tool for the gentle levelling of all solid König fillers. **Special Fillers Applicator:** The smart nostrum for the processing of Soft Wax, Hard Wax and Hard Wax PLUS. Elements: Corpus with planer grooves, drawer with cleaning comb sanding and polishing cloth (small) and sanding pad (coarse).

Combination Planer: The Combination Planer consists of the modified Special Fillers Applicator with integrated mini Metal Planer blade. **Special Scraper:** For levelling the filled area evenly and to remove lacquer runs and bumps in the lacquer surface. High-quality steel, tempered and sharpened cutting edges.

USE THE KNOW-HOW

Take advantage from our Trainings!

Take advantage of our expertise! We have been offering our customers customized seminars tailored to the requirements of various industries and application areas—especially for the window industry. Through both theory and hands-on practice, we not only provide you and your employees with the knowledge needed for professional surface restoration, but also help you develop your eye for detail and manual dexterity. Benefit from our seminar leaders' decades of experience and learn the right techniques to achieve the best possible results with our products. Professional restoration is a demanding and creative craft that requires not only high-quality materials but also knowledge of the correct procedures and the skilled application of proven techniques to achieve a perfect result. With us, you get all of this from a single source.

On-Site Training

With our On-Site Training, an expert trainer comes to your facility to work closely with you and your employees. In both a classroom setting and on the floor, we will show you how to use the König Touch-Up Products and work with you on your day-to-day repair needs in the workday settings. Our training will focus on your operations to allow for a more professional, better equipped, and productive environment to achieve success in enhancing your finished product and reducing added waste costs. Our instructors will demonstrate how to visualize the damage, select the appropriate products, and perform the repairs necessary to the most common Touch-Up and Repair situations:

Surface Pressure Marks, Surface Color Matching, Minor Surface Abrasions, Coloring Unfinished Edges, Fine Surface Scratches, Replacing Grain to Finish, Deep Surface Damages, Sealing and Sheen Adjustment

Get in touch with us via Mail: trainings@heinrich-koenig.com

Touch-Up and Repair Workshops

Training suitable for: Carpenters, Interior Designers, Installation Service, Moving Services, Craftsman, and Manufacturing Service Reps.

Topics covered: Introduction to the world of repair, rules of repair (preparation, pre-coloring, filling, adding grain, sealing, and gloss adjustment). Development of differences in the repair of solid wood, laminate, and decorative surfaces.

Performing repairs on: Scratches, Dents, Edge Damage, Open Joints, Sand-Thru Areas, and others.

Whether you are new to the touch-up industry or work in the field, you will learn the use of the König products to get the best results for your job completion. Our instructors have worked with König products for over 30 years and will work with you in a classroom setting and hands on to give the best advice and techniques to allow you to excel with the König products.

You can find the complete König product line in our general catalog, available for download
